Letter on the research results integration

We hereby confirm that the results of research under the subprogram "The concept of a digital portal for assessing the scientific capacity and research performance " (under the research program "Kazakhstan's way to a knowledge-based economy based on the third technological modernization: strategy, models and mechanisms") have scientific significance and practical interest for Ankara Yildirim Beyazit University.

It is our great pleasure to explore the analyzed approaches for research performance evaluation of countries and organizations and integrate them into organizational and methodological aspects of research performance assesment system of Ankara Yildirim Beyazit University.

Institute of Economics and Ankara Yildirim Beyazit University continue to collaborate by doing joint research titled "Individual Perseptions of Academic Research Performance Criteria: An International Comparative Analysis between Turkey and Kazakhstan" and this research results expected to have implications for research policy in Kazakhstan as inTurkey.
